Using react router dom

- Generate 2 layout
  - Main layout which contain
    - Navbar with (home - product- category - brand- About - contact -setting dropdown)
      components and logout button
    - Footer with same links as Navbar
  - logOut user layout contains
    - Navbar with (About - contact - login - register) components
    - Footer with the same

Setting dropdown contains
- App setting
- Profile setting
- Web setting

Implement 404 page for both layout
